Celebrate our veterans in May

May is Veterans Appreciation Month. A U.S. Department of Veterans Affairs study found that 18% of the veterans who sought jobs within one to three years of discharge are unemployed and that one out of four veterans who did find jobs earned less than \$21,840 a year. The California Employment Development Department gives veterans priority in job and training referrals and other employment-related services. For additional information on veteran programs visit http://www.edd.ca.gov/jobs_and_training/Services_for_Veterans.htm

Assembly Member Carter's bill to make older homes more energy efficient

The lack of new home construction in a weakened economy has created a \$170 million surplus in a state trust fund that provides financial incentives to install solar energy systems on new residential construction. Assembly Member Carter wants to "put the money to work today" through her Assembly Bill 2132, which would direct some surplus funds from the Renewable Resources Trust Fund to older residences to make them more energy efficient. Homes that would benefit from the surplus funds would be those built before 1978 and not subject to California's building efficiency standards.

"This bill helps reduce energy consumption and utility bills for renters and homeowners, who are often left out of utility incentive programs that are geared toward buyers of newly-constructed homes," Assembly Member Carter said. Contact the capitol office for more info at (916) 319-2062.

License plate bill will help Vets

Assembly Member Carter's license plate bill, AB 1908, seeks to market the veteran's organization license plates. The resulting revenue increases will enable the County Veterans Service Officers CVSOs and California Department of Veterans Affairs to expand operations that provide veterans and their families free claims assistance and referrals to local, state and federal programs.

The bill is jointly authored by Assembly Member Paul Cook. It is believed that modifying the plate's design will make it more appealing and having the Department of Motor Vehicles make the plate available for on-line ordering will stimulate sales.
